25X1

1. The airfield about 1 mile west of SCHNEIDEMUEHL (P 54/R 94) was about 5,600x5,000 feet and had two diagonal concrete runways, each about 5,000x265 feet. Both runways were undamaged. On the eastern side of the field there was an oval asphalt road, about 65 feet wide, which, as was inferred from excavation work started on the southern side of the field, was to be continued to the west. The work was, however, not completed.
2. The buildings on the northern side of the field, including the hangars, were heavily damaged.
3. Although the landing field and runways were intact the field had obviously not been used since the war.
4. The installations of the SCHNEIDEMUEHL airfield were almost completely destroyed. The field seemed to have been unused since 1945. The runways were undamaged and serviceable.

25X1

Comment:

The data on the condition and location of the SCHNEIDEMUEHL airfield confirms previous information. The destroyed field installations have not been reconstructed. No air unit is assumed to be stationed there.
